Palindrome day in all three major systems

Not that anything other than ISO dates matters

World's largest conference

- 893 events
- 449 hours 55 minutes of content
- 836 speakers
- 72 tracks, 67 of them devrooms
- 63 stands

Useless numbers...

- How many MAC addresses did we see?
 - 2017: 11,614
 - 2018: 175,000+
 - 2019: 123,875
 - 2020: 10,957 - we are not counting the probes any more
- Privacy extensions and other mechanisms actively hide and inflate those numbers
- We have become better at filtering that out
- And it seems some overzealous playchildren settled down a bit

Reminder

- 2017, we felt the need to inform about what networks we do and do not run
- 2018, we felt the need to talk about MITM
- 2019, we had some script kiddies try and ARP spoof our default gateway
- 2020, we strengthened our defenses against ARP spoofing some more ;)
- State actors gather a lot more data about you than anyone at FOSDEM ever could

What do!?

- Use encryption
- Use VPNs
- Use encrypted services
- Did I mention encryption?

IPv6 is here

- Last IPv6 slide, I already skipped it in the infrastructure review
- Other than for VPN applications, IPv6 has won

Swag

- 490 hoodies
- 2085 straight-cut t-shirts
- 190 fitted t-shirts
- First run-out: XXXL shirts Saturday at 14:12:00
- We ran out of ALL the things again, even though we almost doubled many amounts...

Food

- 1200 pasta dishes
- 1000 kg fries
- 350 wraps
- 450 kebabs
- 550 vegan wraps
- 200 brownies
- 80 liters of soup
- 2000 sugarwaffles
- 500 bags of waffles
- 1000 burgers
- 800 wings
