# Observability Day

Observability Day  
NORTH AMERICA

## Past, Present and Future

# Call for Papers!

Observability Day  
NORTH AMERICA

**CFP's are now open for 2024 CNCF-Hosted Co-Located Events**

**19 March 2024, Paris, France**

**CFP Closes:** Sunday, 3 December at 11:59pm Central European Time (UTC+1)

**CFP Notifications:** Monday, 8 January

**Schedule Announcement:** Wednesday, 10 January

**Scan for more information:**

## How to take the most of Observability Day ?

**Networking:** on breaks, say “Hi” and introduce yourself to others.

All **speakers are here to help**, feel free to approach them.

**Remember:** we are all learning (including speakers)

Speakers: handheld mics up front or get a lapel at the back

# Schedule

Observability Day  
NORTH AMERICA

9:00am – 9:10am	<ul style="list-style-type: none"><li>○ <b>Welcome + Opening Remarks, Program Committee Members - Austin Parker, Honeycomb.io: Eduardo Silva, Calyptia: Richard Hartmann, Grafana Labs</b> <i>Speakers: Richard Hartmann, Eduardo Silva, Austin Parker</i></li></ul>	W176abc
9:15am – 9:40am	<ul style="list-style-type: none"><li>○ <b>Project Updates</b> <i>Speakers: Richard Hartmann, Eduardo Silva, Austin Parker</i></li></ul>	W176abc
9:50am – 10:15am	<ul style="list-style-type: none"><li>○ <b>Business Observability – FinOps at Grafana Labs - Richard Hartmann, Grafana Labs</b> <i>Speakers: Richard Hartmann</i></li></ul>	W176abc
10:25am – 10:50am	<ul style="list-style-type: none"><li>○ <b>Energy Observability Using Kepler: Revolutionizing Cloud Efficiency - Sally O'Malley, Red Hat &amp; Marcelo Amaral, IBM</b> <i>Speakers: Sally O'Malley, Marcelo Amaral</i></li></ul>	W176abc
11:05am – 11:30am	<ul style="list-style-type: none"><li>○ <b>OTTL Me Why Transforming Telemetry in the OpenTelemetry Collector Just Got Better - Tyler Helmuth, Honeycomb &amp; Evan Bradley, Dynatrace</b> <i>Speakers: Tyler Helmuth, Evan Bradley</i></li></ul>	W176abc
11:40am – 12:05pm	<ul style="list-style-type: none"><li>○ <b>Dynamic Sampling in Practice - Kent Quirk, Honeycomb</b> <i>Speakers: Kent Quirk</i></li></ul>	W176abc
12:10pm – 12:35pm	<ul style="list-style-type: none"><li>○ <b>Monitoring and Metadata - Exploring Approaches to Attaching Metadata to Logs, Metrics and Traces - Ridwan Sharif, Google</b> <i>Speakers: Ridwan Sharif</i></li></ul>	W176abc

# Schedule

Observability Day  
NORTH AMERICA

1:30pm – 1:55pm	<ul style="list-style-type: none"><li>○ <b>Huddle - Insightful Latency Optimizer for Clusters with Sparse and Complex App Flows - Yash Bhatnagar, Google</b> <i>Speakers: Yash Bhatnagar</i></li></ul>	W176abc
2:05pm – 2:30pm	<ul style="list-style-type: none"><li>○ <b>How Prometheus Halved Its Memory Usage - Bryan Boreham, Grafana Labs</b> <i>Speakers: Bryan Boreham</i></li></ul>	W176abc
2:40pm – 3:05pm	<ul style="list-style-type: none"><li>○ <b>"How Much Overhead?": How to Evaluate Observability Agent Performance - Braydon Kains, Google Cloud</b> <i>Speakers: Braydon Kains</i></li></ul>	W176abc
3:15pm – 3:40pm	<ul style="list-style-type: none"><li>○ <b>Journey from Fluent Bit, Fluentd and Prometheus to OpenTelemetry Collector - Lessons Learned - Marcin "Perk" Stożek, Canonical</b> <i>Speakers: Marcin 'Perk' Stozek</i></li></ul>	W176abc
3:50pm – 4:15pm	<ul style="list-style-type: none"><li>○ <b>Observability Considerations for Infrastructure Cost Optimization - Alolita Sharma, Apple</b> <i>Speakers: Alolita Sharma</i></li></ul>	W176abc
4:25pm – 4:50pm	<ul style="list-style-type: none"><li>○ <b>Observe Thy CI/CD Pipelines with OpenTelemetry - Reese Lee, New Relic &amp; Adriana Villela, Lightstep from ServiceNow</b> <i>Speakers: Reese Lee, Adriana Villela</i></li></ul>	W176abc
5:00pm – 5:05pm	<ul style="list-style-type: none"><li>○ <b>⚡ Lightning Talk: Unveiling DPDK Application Telemetry: A Path to Traffic Visibility and Monitoring - Jianzhu Zhang, Red Hat</b> <i>Speakers: Jianzhu Zhang</i></li></ul>	W176abc
5:10pm – 5:20pm	<ul style="list-style-type: none"><li>○ <b>Closing Remarks, Program Committee Members - Austin Parker, Honeycomb.io: Eduardo Silva, Calyptia: Richard Hartmann, Grafana Labs</b> <i>Speakers: Richard Hartmann, Eduardo Silva, Austin Parker</i></li></ul>	W176abc

# Code of Conduct

Observability Day  
NORTH AMERICA

Remember the **Golden Rule**: Treat others as you would want to be treated - with kindness and respect

Scan the QR code to access and review the **CNCF Code of Conduct**:

# Captioning and Translations

Observability Day  
NORTH AMERICA

**ACCESSIBLE VIA WORDLY ON YOUR PERSONAL DEVICE**

- Scan the QR code:

**Choose your language, session ID will auto-populate, and select “Attend.”**

- Captioning will begin when the session does.

# Refreshments and Lunch

**Refreshments, snacks and lunch can be found outside the session room in the foyer as well as in Room W183.**

**Please also join us at the CNCF-Hosted Co-Located Event reception in the foyer from 5:30-7:00PM tonight!**

Social Media Hashtag **#O11yDay**

Virtual Discussions **#tag-observability** on CNCF Slack

Speakers: Please go to AV Team **5m** before the start of your presentation

Sticker & swag table for sponsors & CNCF projects at the back

# Talk Tables

Observability Day  
NORTH AMERICA

During lunch, we will have **Talk Tables** set up for you to chat about subjects of interest.

## Thank you all !

- Ling Huang
- Bartłomiej Płotka
- Paige Cruz
- Julien Pivotto
- Richard Hartmann
- Austin Parker
- Alolita Sharma
- Eduardo Silva
- Juraci Paixão Kröhling
- Sandeep Chatra Raveesh
- Shishi Chen
- Vijay Samuel

# keep\_firing\_for

```
...  
# How long an alert will continue firing after the condition that triggered it  
# has cleared.  
[ keep_firing_for: <duration> | default = 0s ]  
...
```

# scrape\_config\_files

In general: enable more of a building block style configuration

Add 'scrape\_config\_files'

Split Prometheus scrape configs into multiple files, avoiding having to have really big configuration files.

Also see: snmp\_exporter's new auth module

OpenMetrics will join Prometheus

# OTLP receiver

Observability Day  
NORTH AMERICA

Experimental support for receiving OTLP metrics.

Not production ready, needs work on both server side and OTLP client side, but a good step towards supporting OTLP workloads natively.

Experimental support for receiving OTLP metrics.

Not production ready, needs work on both server side and OTLP client side, but a good step towards supporting OTLP workloads natively.

- Breaking change: new configuration format.
- The new format splits connection settings from metric details, making it simpler to change authentication without redoing the entire configuration.
- Add the ability to query multiple modules in one scrape.
  - e.g. query at the same time, in the same job, vendor-specific MIB and generic MIB.

# Windows Exporter

Observability Day  
NORTH AMERICA

The Windows Exporter is becoming an Official Exporter.

This was delayed by licensing exceptions, but we are in the final stage.

# MySQLd Exporter

Observability Day  
NORTH AMERICA

Multi-targets support like blackbox, SNMP, modbus, ipmi, prusa, etc exporters...

You can use a single MySQLd exporter to monitor multiple MySQL-alike servers. Takes a `?target` parameter.

- client\_java 1.0.0
- OpenTelemetry metrics and tracing support, with native Prometheus API
- Native Histograms

# What's coming

Observability Day  
NORTH AMERICA

- New Alertmanager UI
  - New React UI to align with the rest of the Prometheus Ecosystem
- Metadata Improvements
  - Metric type
  - Created time
  - Persisted in TSDB
- Exemplar Improvements
  - Retained by recording rules
  - Persisted in TSDB
- Remote Write v2
  - Transactional remote write
  - Reduce bandwidth

# One more thing...

Observability Day  
NORTH AMERICA

We are working on Prometheus 3.0. If you have big audacious goals, now is the time to get in touch.

# Fluentd & Fluent Bit

**Observability Day**  
NORTH AMERICA

November 6, 2023 | Chicago, Illinois

**Eduardo Silva**  
Founder & CEO  
*Calyptia*

**CLOUD NATIVE**  
COMPUTING FOUNDATION

# Fluent Ecosystem

**Open Source Observability**

**No vendor lock-in**

**Telemetry Pipelines**

# Fluent Bit Ecosystem

## Trusted by major Cloud Providers

Amazon Web Services (AWS)

Google Cloud

Microsoft Azure

Oracle Cloud

OBSERVABILITY DAY

# 10.9 Billion downloads

Total downloads as of today (Nov 06, 2023)

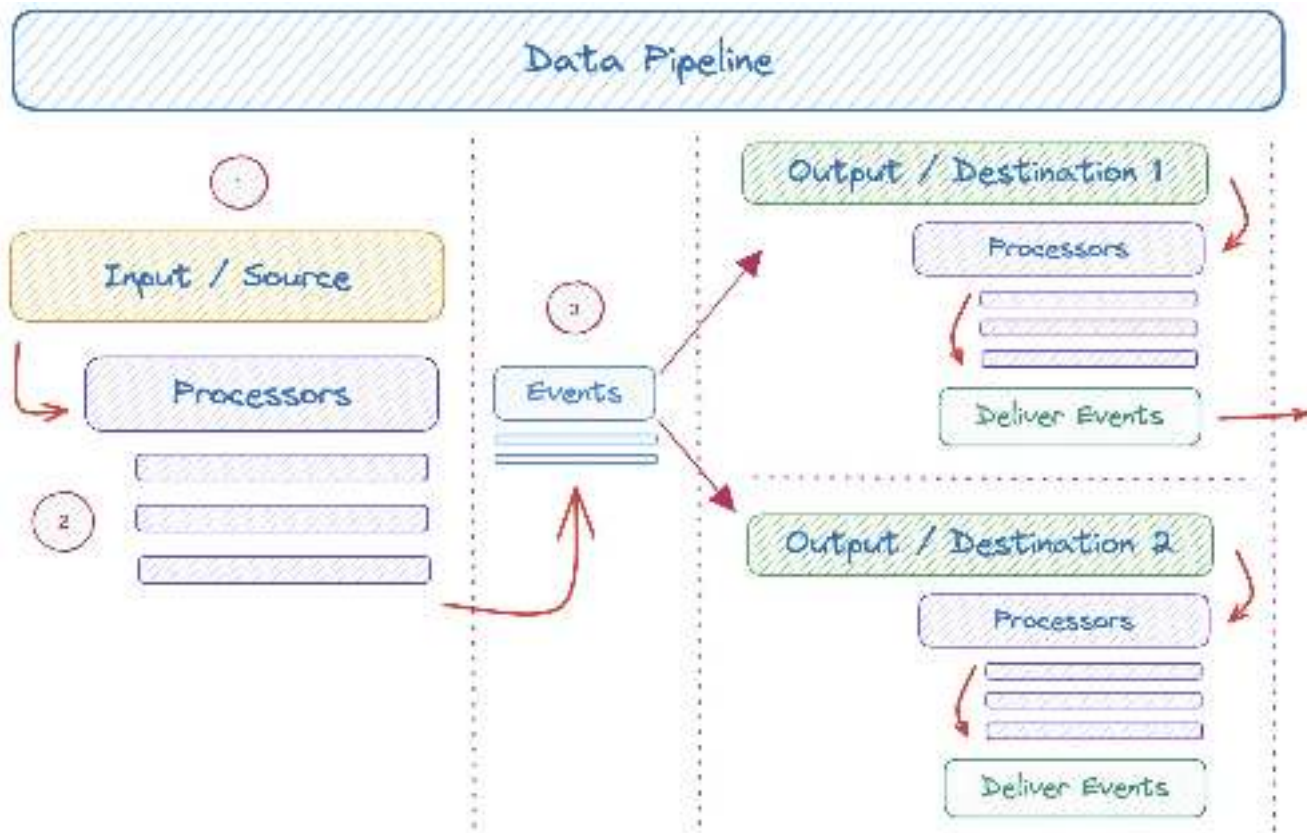

fluentbit v2.2

# Fluent Bit Pipeline

Collection, Enrichment, Filtering, Routing and Processing

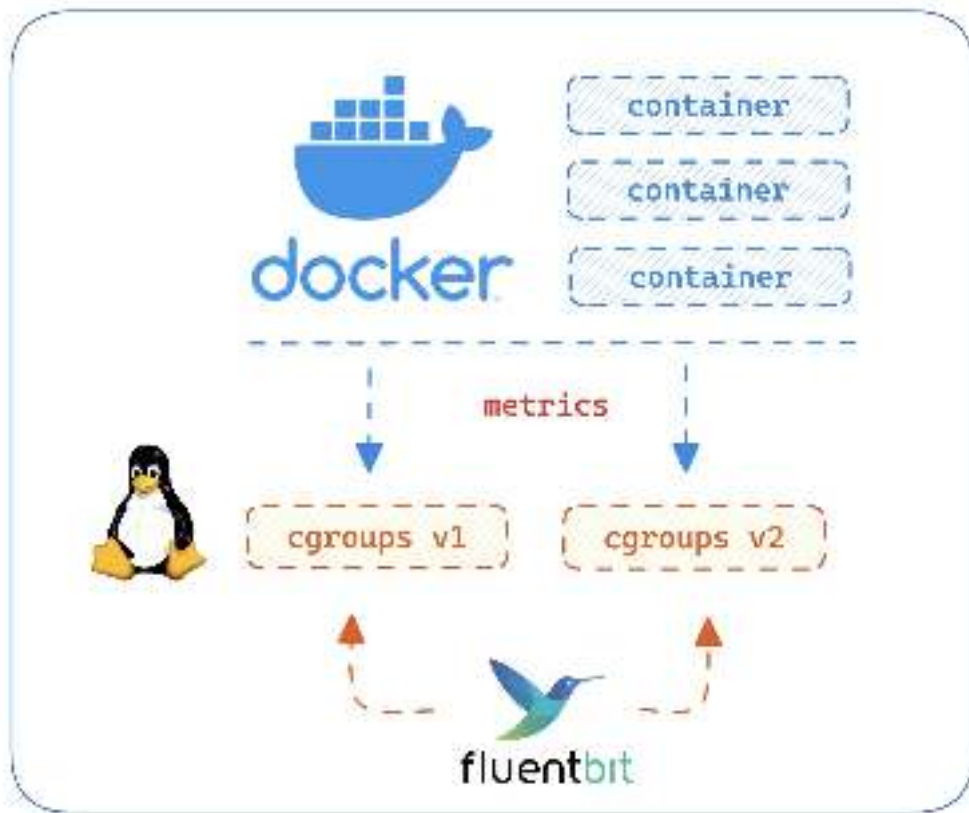

## New filter and processor

# Docker Metrics Collector

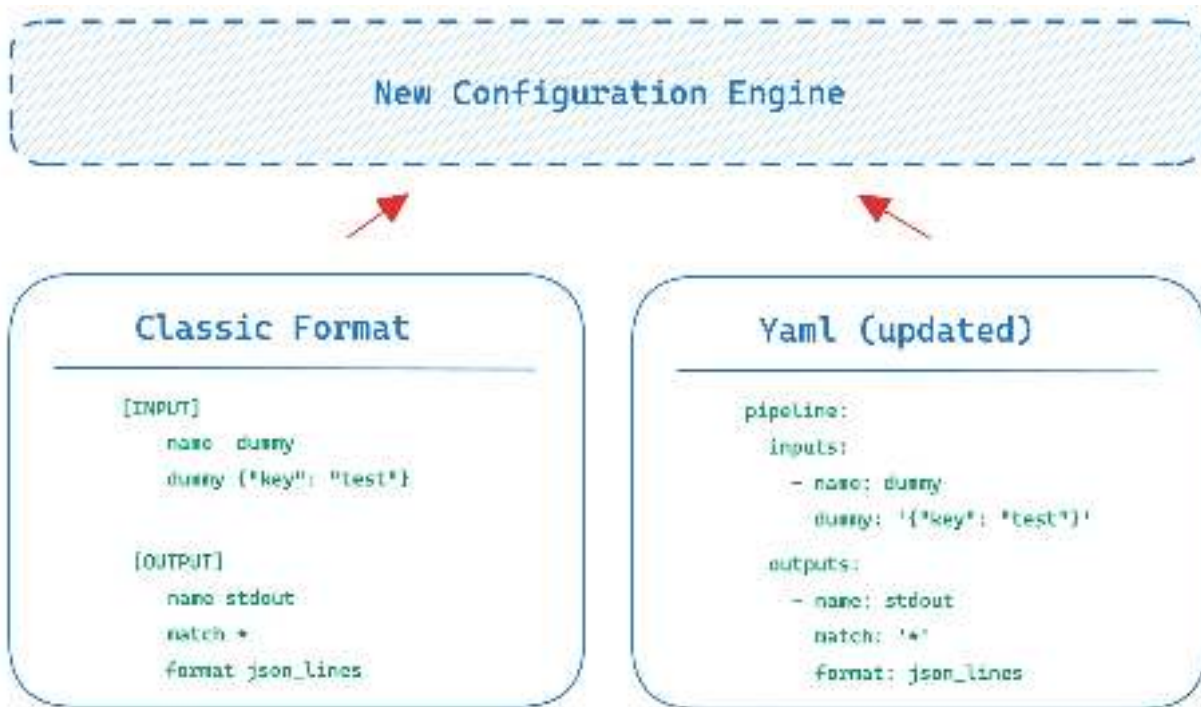

## Add support for cgroups v2

Fluent Bit now can scrape Docker container metrics by supporting Linux environments with cgroups v1 or cgroups v2.

# Configuration Engine

## Enhanced Yaml support (idiomatic)

# [Linux] Node Exporter Metrics

Collect Linux operating system metrics

**100%** Inspired by  
**Prometheus Node Exporter**

# Grafana Loki

## Enhanced connector

- Deprecating original Loki Golang plugin
- Fluent Bit Loki native integration

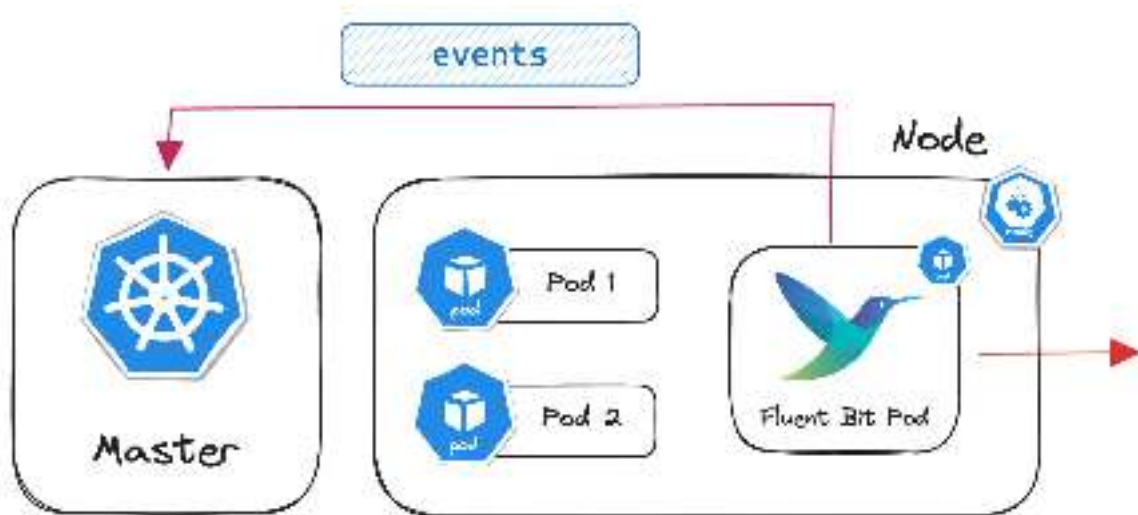

# Kubernetes Events

## Get cluster events

Retrieve Kubernetes Events,  
It supports namespace  
configuration.

# Performance Improvement

## FS Storage + Checksums ON

When using multiple filters with hybrid mem+fs storage and checksums ON, we accomplish a 6x improvement in performance.

**6x Improvement**

# Community Update: new Fluent Bit book

# What's next ?

# OpenTelemetry Project Updates

**November 6, 2023 | Chicago, Illinois**

**Austin Parker**

Director of Open Source  
*Honeycomb*

## What's new in OpenTelemetry?

- Logging GA
  - GA in Java, .NET – other languages soon (Python, JS, etc.)
- Elastic Common Schema alignment
  - Reducing the number of duplicative standards.
- OTLP 1.0
- 2nd highest velocity of CNCF projects (behind k8s)
- All time high in contributors and contributing orgs.

# OpenTelemetry Updates

Observability Day  
NORTH AMERICA

## What's new in OpenTelemetry?

- OpenCensus deprecation

# OpenTelemetry Updates

Observability Day  
NORTH AMERICA

## Major Milestones

- 4/24 The reference candidate is presented for review.
- 5/8 Teams form, and work begins in all languages.
- 5/20 Project officially launched at Kubecon Barcelona.
- 9/6 C#, Golang, Java, NodeJS, and Python reach parity with existing projects.
- 11/6 OpenTracing and OpenCensus projects are officially sunset.
- 11/20 Sunset party at Observability Summit, Kubecon San Diego.

## Timeline to Convergence

# OpenTelemetry Updates

Observability Day  
NORTH AMERICA

## Major Milestones

- 4/24 The reference candidate is presented for review.
- 5/8 Teams form, and work begins in all languages.
- 5/20 Project officially launched at Kubecon Barcelona.
- 9/6 C#, Golang, Java, NodeJS, and Python reach parity with existing projects.
- 11/6 OpenTracing and OpenCensus projects are officially sunset.

# OpenTelemetry Updates

Observability Day  
NORTH AMERICA

## Major Milestones

4/24 The reference candidate is presented for review.

5/8 Teams form, and work begins in all languages.

5/20 Project officially launched at Kubecon Barcelona.

9/6 C#, Golang, Java, NodeJS, and Python reach parity with existing projects.

11/6 OpenTracing and OpenCensus projects are officially sunset.

11/20 Sunset party at Observability Summit, Kubecon San Diego.

## Timeline to Convergence

201923

# OpenTelemetry Updates

Observability Day  
NORTH AMERICA

**You did it!**

- OpenTelemetry has achieved its original vision, set forth in early 2019.
- Traces, metrics, and logs are available in four major languages\*
- We'll talk more about the future this week, but for now...

## Congratulations!

\*Some work non-stable

# OpenTelemetry Updates
