2020-02-01

Welcome to our fourth monitoring devroom in a row!

Thanks!

Ben Kochie

Brian Brazil

Carl Bergquist

Fabian Staeber

20 years...

20 years of FOSDEM

Time for reflection

Reflection

Four times in a row...

Seven, in total, is top list territory!

Full disclosure

I am FOSDEM staff, but have never done devroom selection/coordination

...don't even know how they are selected

...so I am not voting for or influencing the selection process in any way

Content

CfP selection was done blindly

Still massive representation from Red Hat and Grafana

This shows company strategy, but also that more people should submit interesting stuff

Diversity

Reminder: We offer training, feedback, help for diversity speakers

No travel sponsorship as this is all done by volunteers

On a personal note

Another full disclosure

I joined Grafana as Director, Community

Will be super interesting

Looking ahead

Tracing is still gathering steam

Refelected in talk selection

First three talks are tracing-only

Rest of the content

Rest split up into Deep, Genereal, Fun in a cycle, ending with general content

Looking further ahead

There's talk about going back to monoliths for some workloads

There's talk about getting nearer to metal again

There's talk about putting storage and compute closer together and not offloading to the network

Looking further ahead

This will impact the observability space

Things will remain fun!

Rules

Take all trash with you, no matter if yours or not.

Use the trashcan to the back.

Respect

Speakers do this for free.

To maximize Q&A time we will allow you to leave & enter during the Q&A.

Leave and enter quietly or we WILL shout you down.

Fun

Have fun!

I know we do
