Making hard things easier, a brief timeline

A close-up photograph of a person's hand holding a piece of brown cardboard. On the cardboard, there is a hand-drawn diagram with several vertical lines and a horizontal line, resembling a technical sketch. A small, light-colored wooden block is placed on the cardboard, partially overlapping the drawing. The background is a solid teal color.

Root Cause Analysis Workbench

A photograph of a large, light-colored wooden shelving unit in a workshop. The unit features a grid of open shelves on the left and a solid wooden back panel with a horizontal shelf on the right. The text "Understanding any system with complex dependencies" is overlaid in white. In the background, a window and various workshop items are visible.

✨ Grafana Assistant

The screenshot displays the Grafana Assistant interface within a web browser. The top navigation bar includes the Grafana logo, a breadcrumb trail (Home > Assistant > Grafana Assistant), a search bar, and user controls. The main content area features the assistant's greeting, a description of its capabilities, and a chat input field with a sample prompt. Below the chat input are three buttons: 'Previous investigations', 'Settings', and 'Review my prompt'. On the right side, a panel titled 'Query Recent Loki Errors' shows a user request to 'show a graph of errors over time'. The assistant responds by creating a graph. The graph, titled 'Error count over time by service', plots error rates (evt/s) from 10:00 to 12:30 for several services. A legend at the bottom identifies the services: MultiHTTP Complex Check*, Validate homepage*, Validate logi*, alloy-logs*, checkoutservice*, and edit docs frontend client*.
